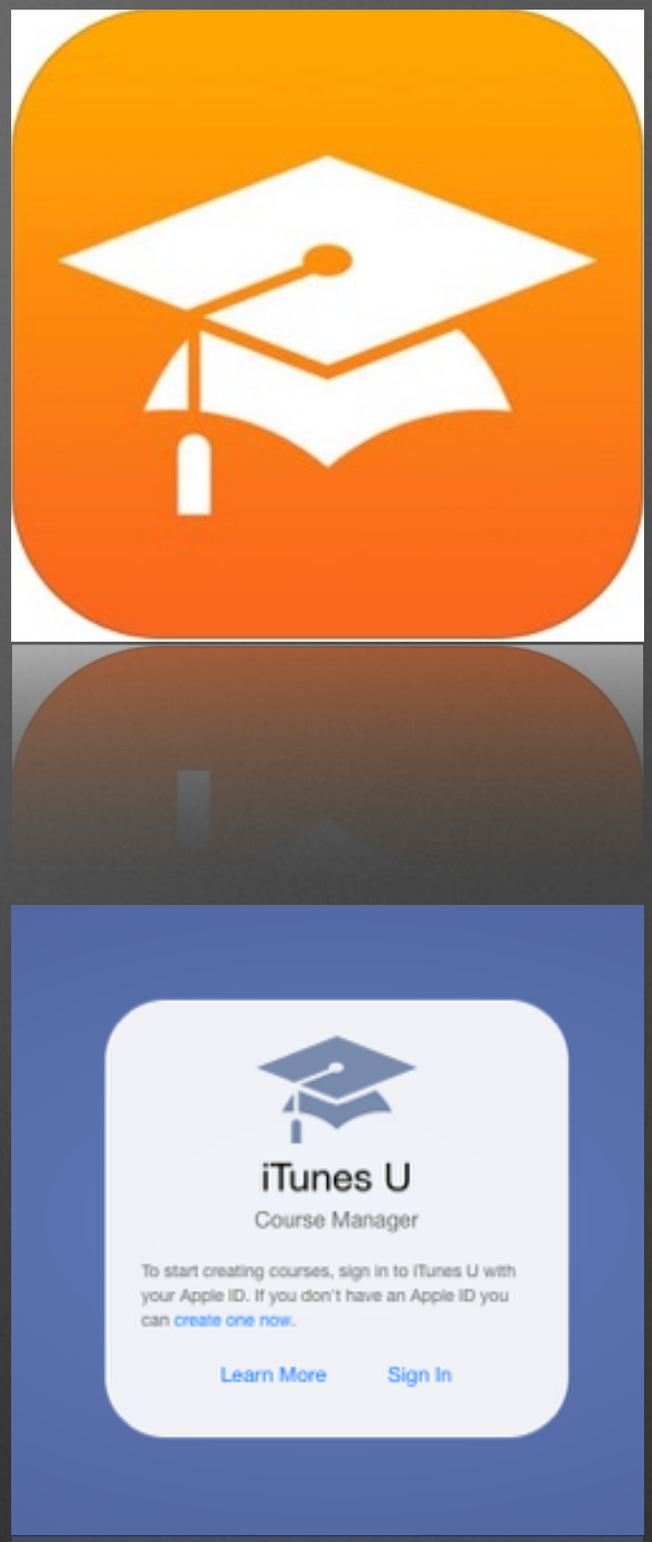
Curriculum Platform

- iTunes U allows teachers and school districts to host private and public courses
- Engaging instructional design
- Materials available on and offline
- Vertical and horizontal alignment
- Blended learning environment
- Collaborative discussion features
- TASA iTunes U Courses



Reflection

What tools do you use to make assessment grading easier?

How does instant response in assessment benefit students?

LMS

An LMS is an electronic instructional tool that delivers content, receives student assessments, tracks learner progress, and allows for online student-teacher interaction.

An LMS is necessary for digital learning, collaboration and communication

Think about faculty PLNs as well as student-teacher communication

Choose an LMS that works for your district needs

LMS

- Edmodo provides polls and quizzes
- Polls are quick pre-teaching or exit ticket opportunities
- Quizzes can be multiple choice, matching, or true false with instant grading or open question
- Data broken down by question and student

Google Drive

- Google Forms can be used to create surveys, quizzes, and tests.
- Forms must be created on the computer, but can be taken on any device.
- Answers are delivered in a spreadsheet that makes grading easy.
- Flubaroo is an add-on that will grade your Form automatically.

Reflection

How does digital storytelling enhance student learning?

How are 21st Century skills promoted through digital storytelling?

Digital Storytelling

Provides students with the opportunity to express their perspective using relevant technology to enhance reading, writing, speaking and listening skills. Students can communicate through a combination of sound, graphics, videos, photos, and the written and spoken word.
